Photosynthesis equation

Name the first stage of photosynthesis

Site of photosynthesis

Draw a labelled diagram to show what happens in Stage 1 (Light-dependant stage) of photosynthesis

3.3 Photosynthesis

Diagram of a leaf. Circle the letters that show cell layers in which photosynthesis can take place.

- 1
- 2
- 3

List three factors that can limit the rate of photosynthesis

Name of green pigment that captures light

[Empty box]

Name the 2 substances that the sugar produced in photosynthesis can be converted into.

[Empty box]

Name of stage 2.

By-product formed in stage 1 and its fate

[Empty box]

Two substances produced in stage 1 that are needed for stage 2

[Empty box]

[Large empty box]

Draw a labelled diagram to show what happens in stage 2

[Large empty box]
